IsokoLink Rwanda - Logical ERD

Frontend-only marketplace model, mapped from current localStorage data and the prior relational field definitions.

DATA MODEL

RELATIONSHIP NOTATION

PK = primary key REF = logical reference (not enforced) | single bar = one/required open circle + fork = zero or many

SCOPE NOTES

The current app stores objects in browser localStorage; references are not database-enforced. Account emails connect listings and orders by convention.
Cart rows are shared by the current browser. Post comments are nested within each post. This is a logical ERD, not a live SQL schema.
