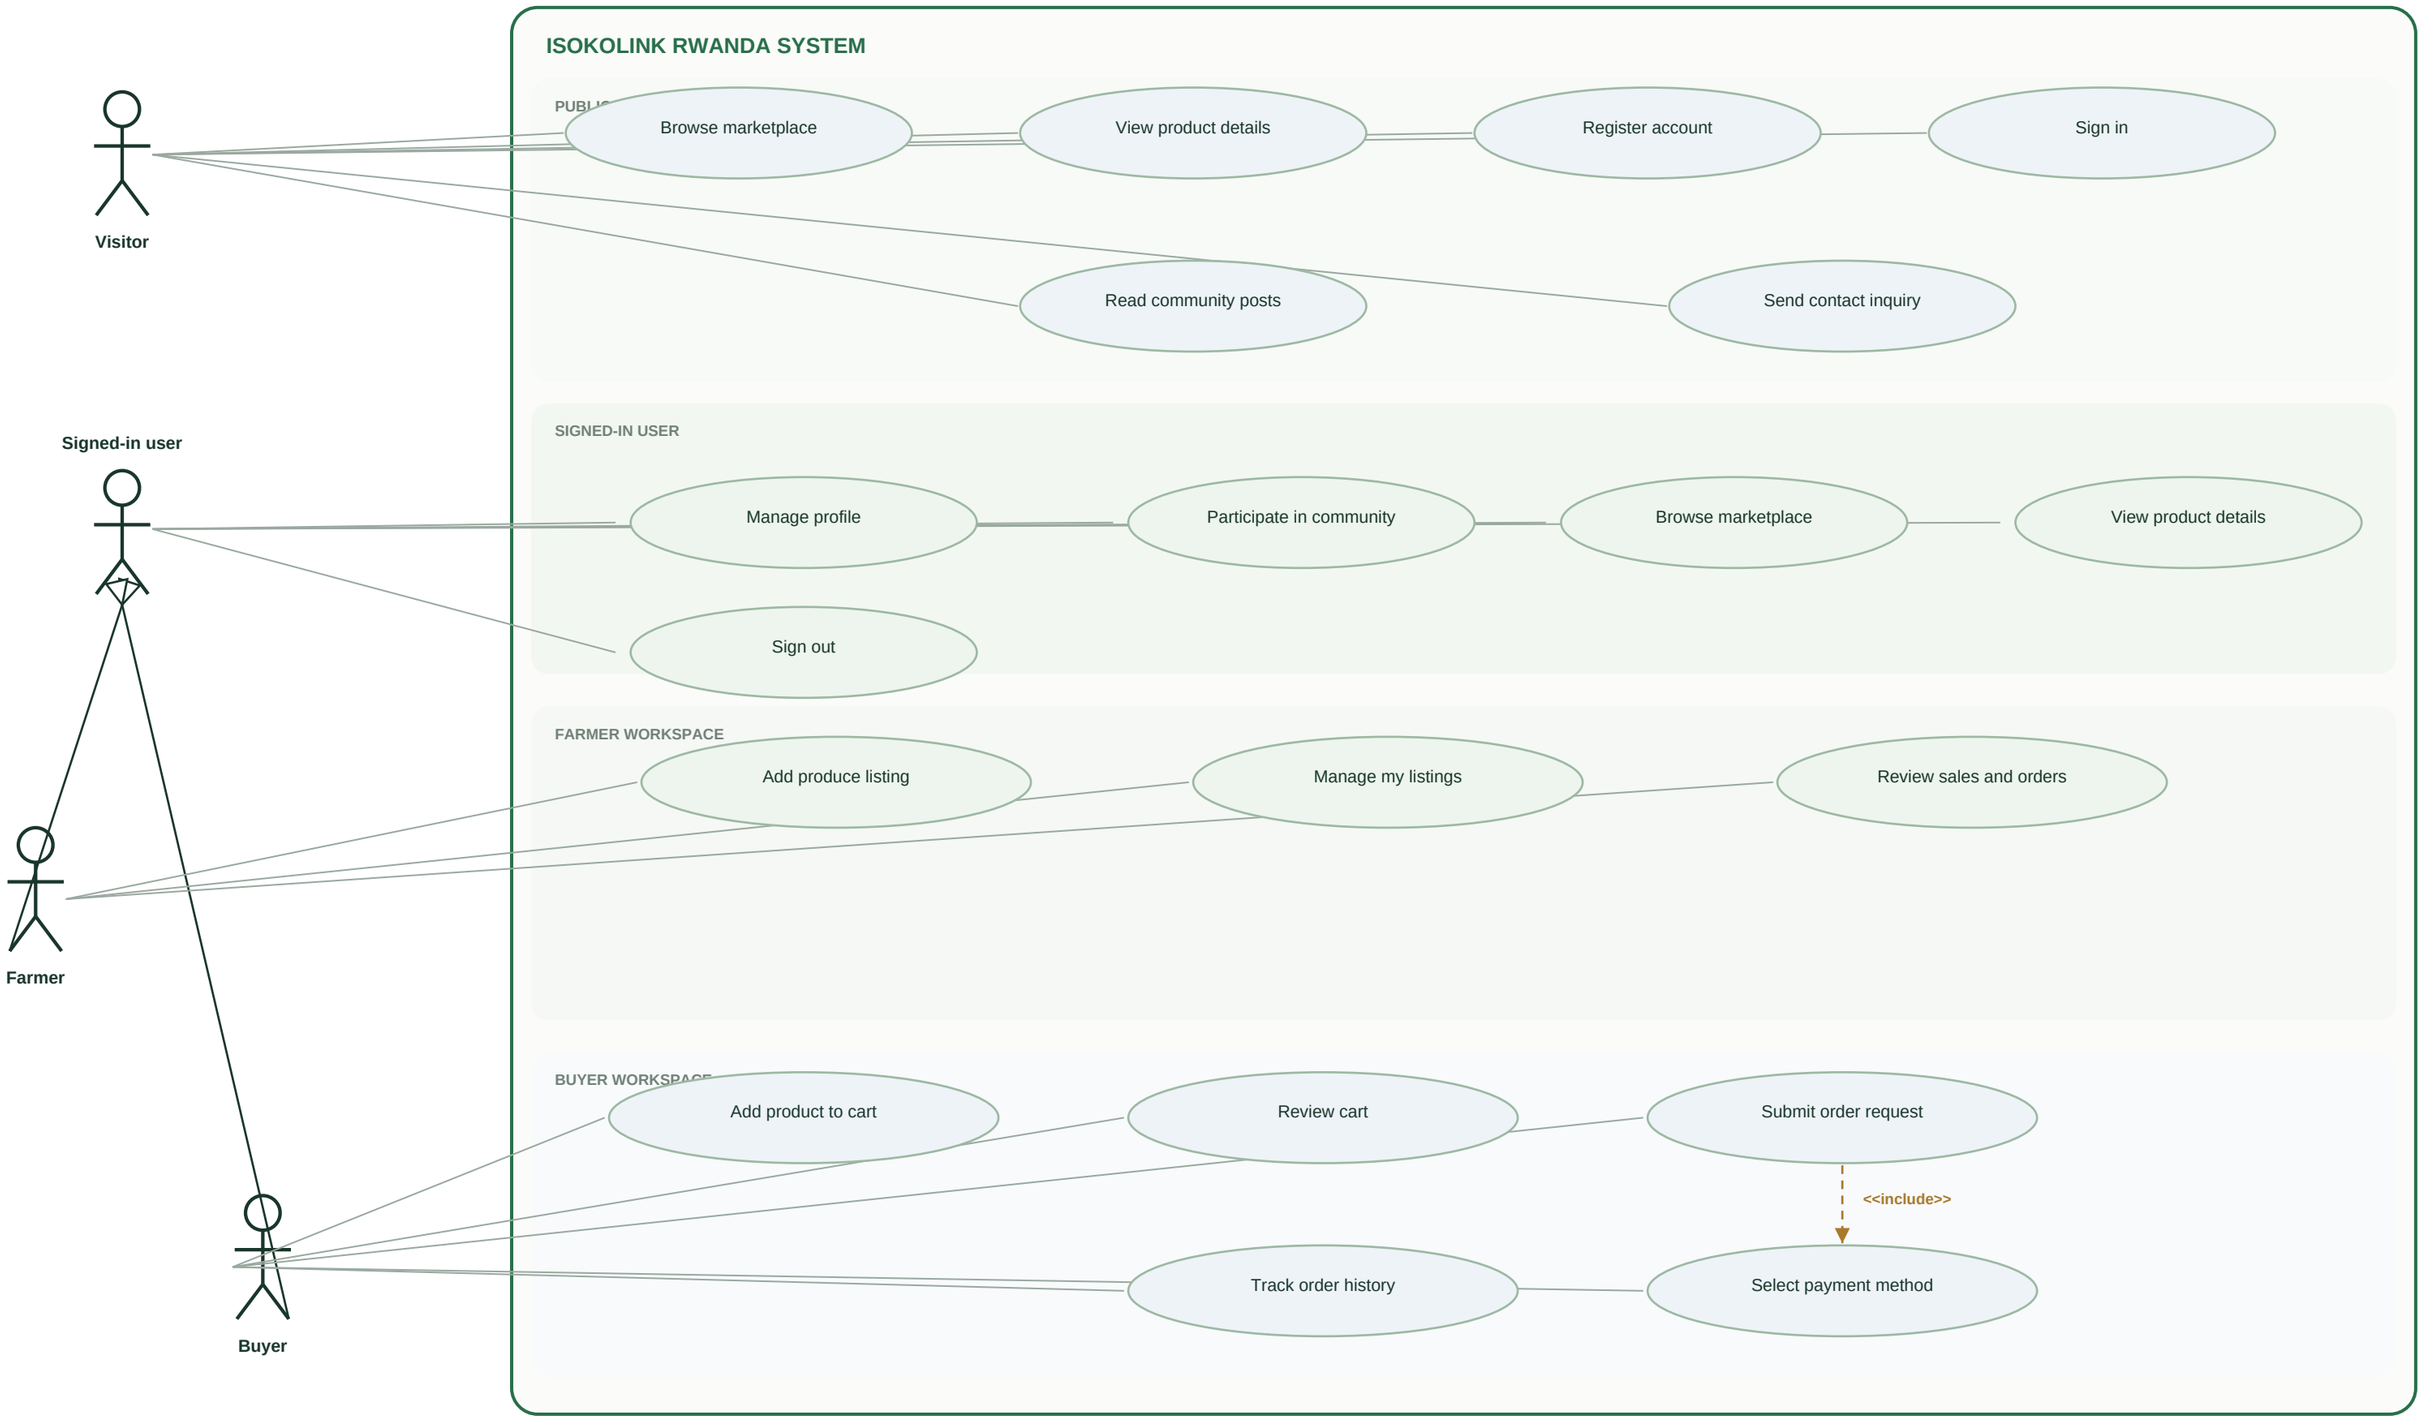
IsokoLink Rwanda - UML Use Case Diagram

Primary interactions in the current frontend-only demo. Payment is simulated; no money is collected.

FUNCTIONAL SCOPE



UML SYMBOLS Stick figure = actor | oval = use case | solid line = association | arrow with open triangle = actor generalization

Dashed arrow <<include>> points to the required included action. Visitors can browse public pages; signed-in user is the parent actor for farmer and buyer roles.

The frontend uses local demo data. Order requests are stored locally, and payment choices are recorded for demonstration only; payment is not charged.
